- ARABIC

- ENGLISH

- FRENCH

EXPERIENCES

Software Developer | Kelmo

APR 2024 - PRESENT

- **Requirement Analysis and Documentation:** Analyzed project requirements and created detailed documents.
- **Developed and Enhanced Features:** Led the development and improvement of key features in existing applications.
- **Configure Cloud Server:** Set up and configured servers to deploy applications.
- **Maintenance and Bug Fixing:** Regularly maintained applications and fixed bugs, making them more stable and reliable.
- **Documentation and Best Practices:** Wrote clear documentation, helping the team follow best practices and easily share knowledge.
- **Technologies:** Nodejs, Java, ReactJS/native, MySQL, AWS, Linux.

Full Stack Developer | AJP Valencia

SEP-NOV 2022

- Designed and developed an app where employees submit support requests.
- The app automatically organizes and prioritizes support requests.
- Build a user-friendly UI that helps technicians track and manage support requests easily.
- Deployed the application on a CentOS 7 server.
- **Technologies:** Nodejs, Expressjs, Reactjs, MSSQL, Sequelize, Redux.

EDUCATION

2024 - 2026 **ENSET MOHAMMEDIA**
Big Data & Cloud Computing

2022 - 2023 **FACULTY OF SCIENCE AND TECHNOLOGY SETTAT**
Bachelor in Full Stack WEB Development and DevOps.

2020 - 2022 **EFET AGADIR**
Specialized Technician in Computer Development.

2018 - 2019 **IBN AL HAYTHEM HIGH SCHOOL MEKNES**
Baccalaureate in science life and earth.

PROJECT

FEB-JUL 2023

- MME (make maintenance easy), an app that manages maintenance work.
- Manage work orders from creation to completion, including assignment to technicians, tracking progress.
 - Provides a user-friendly interface and simplifies the creation and management of work orders.
 - **Technologies:** Java, Spring Frameworks, Reactjs, PostgreSQL, Redux.

JAN-JUL 2022

- BMR (Booking Meeting Room), an app that helps manage meeting rooms.
- The main goal of the app is to prevent unnecessary conflicts and double bookings.
 - Enables users to quickly find and reserve meeting rooms.
 - **Technologies:** Nodejs, Reactjs, PostgreSQL, Sequelize, Redux
